

KAHDU

KDU_PEN_23V1

ILANEL

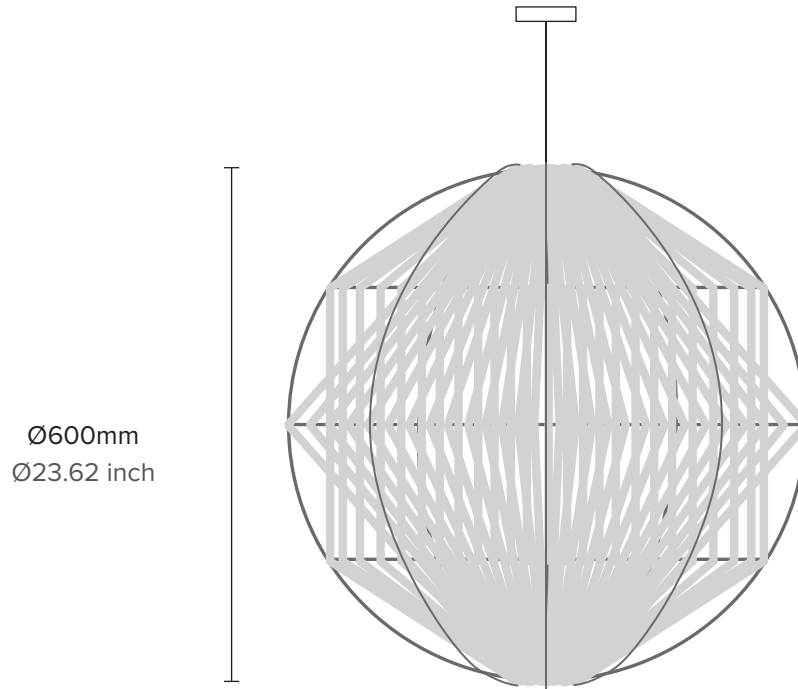

The Kahdu collection features hand-woven lampshades with a visually striking, high-impact pattern that plays with the senses. The lines are rigorous, austere, and mathematical, but at the same time, they dance and interact with one another, giving the impression of movement and depth. Kahdu offers a bold sculptural presence that is warm and organic and a perfect statement for any modern space.
